BEVOLA MARKETING

Aluminium and Kinnegrip

Wide range and new opportunities

Aluminium and Kinnegrip

Bevola have an intention to create a whole business with focus om competitive prices, high quality and the greatest flexibility. It is our wish to help our customers to the most efficient value chain, ergo the shortest distance from producer to the final solution and thereby achieve highest efficiency and the greatest savings. It is common sense and a better bottom lime for everybody.

Wide range and many solutions

Bevola is a strong partner in building components made of aluminium. Bevola has its own and other profile systems in range. Bevola offers profiles as single profiles or worked kit and modular solutions, assembled in our production in Denmark. We are constantly expanding our range of profiles including special profiles for specific customers with special wishes and requirements. For our aluminium solutions, we have a wide range of associated products, which are contributing to preparation of the final solution. Here is the complete range og Kinnegrip-pillars a major product area and also the standard- and special truckbeds, with or without processing. Another important area is surring hooks and rails. Our double deck "EasyDeck" helps to complete our building solutions. Its only fantasy and specific needs that sets limits for Bevolas aluminium solutions and opportunities. In our production, we create all kind of constructions and product solutions for industrial, construction and public sector.

We are open for development work with our costumers about new opportunities.

Environment

Aluminum is a lightweight and environmentally friendly product. Aluminum is 100% recyclable and strength is an eminent part of this metal. We get our primary aluminum from recognized works in Europe and that means more efficient transportation and less CO2 emissions.
