BEVOLA MARKETING

The real history

ROR IS BACK

THE FUTURE

Bevola and axels

Meritor closes but ROR axles continues

After the financial crisis, Meritor decided to withdraw from the European market for trailer axles. For more than 25 years, Assali Stefen in Italy has produced steerable axles for Meritor. Now, under licens, Assali Stefen takes over and continues the axlesproduction at their modern production facilities.

The Robot Line by Assali Stefen

No changes - only improvements

As a customer of Bevola, you will not experience any changes or problems on the supply of axles - Bevola will continue as we always have done. In the longer term, there will be improvements in various areas such as delivery reliability, quality and flexibility. We expect a good product getting even better.

Bevola and customers collaborate

Our success with axles is the story of the close cooperation between supplier and customer. The goal is to create the best business economics at all levels, through adjustment and continuous optimization. Our common success is our customers profits, we will therefor like to use this opportunity to thank you for the great idea- and testwork that constantly is beeing performed by the many talented truck drivers, who we daily work with. The results, yes they are talking to themselves, they have given better bottomlines for everyone.

Bevola and CAAC

Bevola has many years of theoretical and practical experience with the axles. This experience we've actively used in our new CAAC platform for our customers.

CAAC means "Computer Axle Adjustment Concept". Through CAAC the measurement is done

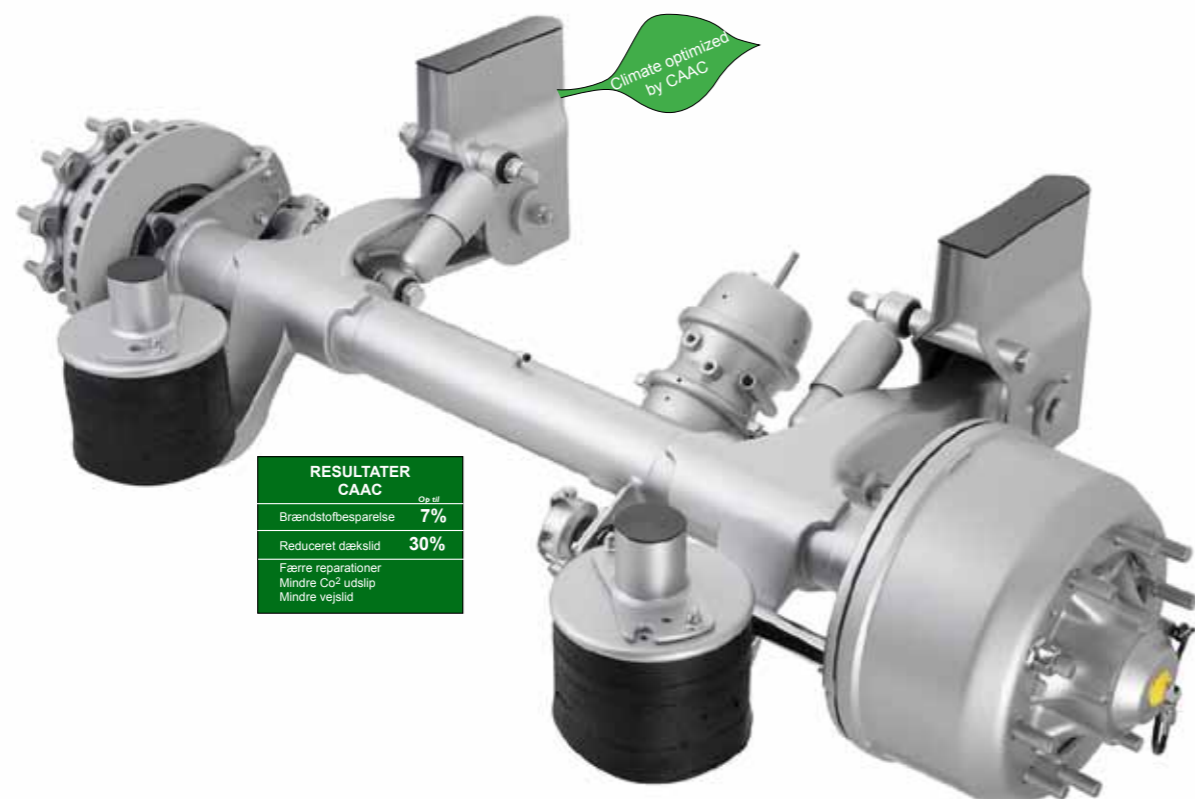

CAAC. Axle adjustment with decisive benefits.

with laser and all axles will therefor be adjustet perfect before delivery. This adjustment means the largest savings for the haulier, the tire wear, fuel and repairs. CAAC also provides a significantly improved environment and reduced wear on roads.

Protection components, developed and produces by Bevola. Especially for the scandinavian market, to optimize the axles durability.

Do you want to hear more about / or be a part of, the continued success, please contact our customer service at Bevola. If you have specific questions about Meritor, feel free to contact Stefan Nilsson for further details.
