Bevola has its own development, production and global procurement concept which offers more than 12.000 products/solutions and the most attractive form of cooperation.

Bevolas Nordic platform, with the widest offer to customers, replaces multiple suppliers/advisers and also gives significant savings for the customers, directly to your bottom line.

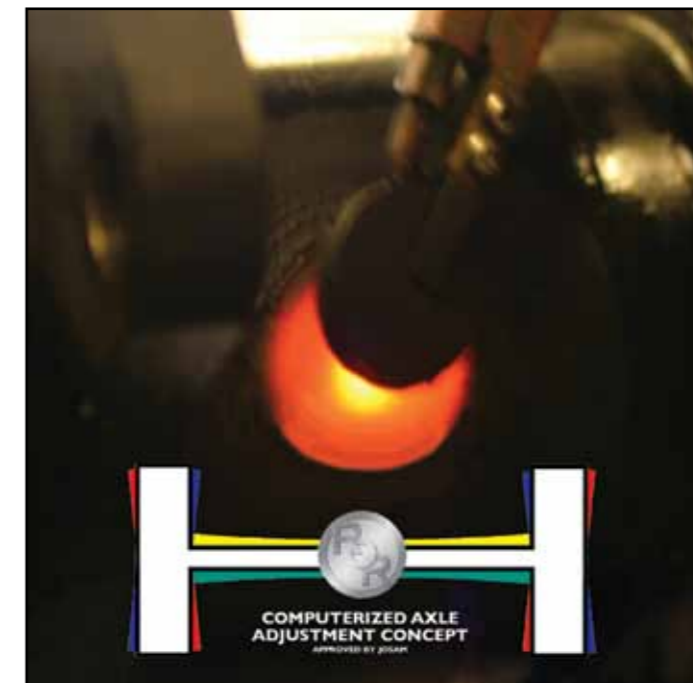

Products and solutions

Bumpers	Baffles and hardware	Toolboxes	Side guards	Axels	Breaks
Drawbars	Kinnegrip-pillars	Tanks	Fittings	Lights and lamps	Cables
Chassis consoles	Veneer	Securing and equipment	Truck bodies	Alu solutions	Clutches
Tubes and spiral hoses	Special-purpose solutions	Sander	Light beams	Inventory and equipment	Wheels and tires
Stay rods	Container equipment	Tip cylinder	Hinges and hardware	Materials	Sundries
ADR- and safety equipment	Switches and cable shoes	Rubber / PVC profiles	Tarp equipment	Gas springs / dampers	Reflectors and signs
Shutters and locks	Stainless steel parts	Innovation	Marketing	Concept development	Production technology

CAAC

Better economy • Increased security
More comfort • Cleaner environment

Economy

CAAC provides significant savings through better quality and fewer repairs. The overall economy improves within tire wear, fuel consumption and downtime. The cost of CAAC is minimal compared to the economic benefits. CAAC is a good investment with greater efficiency and competitive advantage with less problems and lower operating costs.

Environment

A good environment is a prerequisite for the survival of the earth, and CAAC provides significant environmental benefits through low fuel consumption, fewer service visits, fewer spare parts and less wear on roads. That means less CO2 emissions and therefore a better image for the company.

Safety

A good product is essential for optimal security. CAAC ensures that the axle is adjusted properly. An axle decomposes when it is loaded unnecessarily hard through vibration and high friction. Vibration and friction causes heat tires and accelerates metal fatigue in the hub, axle tube and frame. These factors, together with poor maintenance, causes serious accidents.

Comfort

A perfectly aligned axle means more comfort. We all know how annoying it is with wheels which aren't balanced. Most trucks can be more comfortable if all axles are properly adjusted, with less vibrations. Comfort is an added benefit with CAAC, which provides an optimal working environment with fewer problems.

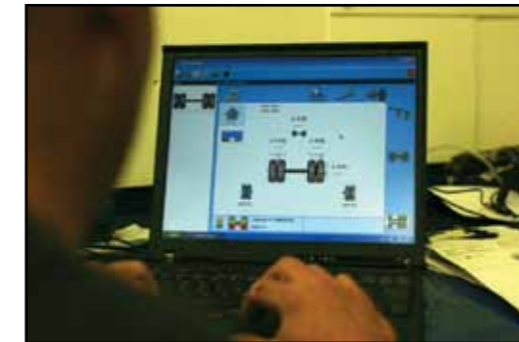

1 The axle places on the bench.

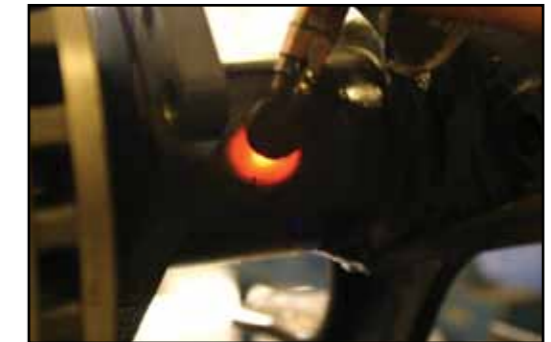

2 The axle is locked.

3 Installation of measuring equipment.

7 Measurement results can be read.

8 Induction heating of the axle tube.

4 Mounting the laser gauge.

5 Calibrating the laser gauge.

6 Extra tractive force with hydraulic.

9 Cooling of the axle tube.

10 Control measurement of the axle.
